Whole New Hands-Free
Cleansing Experience.

What is a BIDET?

We wash our hands with water when it's dirty, so why not wash our private parts with water too? This is where a bidet provides a convenient and hygienic solution.

Essentially, a bidet is a standalone basin or toilet seat attachment that sprays water to clean your private parts more thoroughly after using the restroom. Today, bidets are becoming an essential tool for our personal hygiene because of its benefits such as

Evolution of Toilet Culture

Since the beginning of time, humans were quite creative in using different items to clean themselves after doing their toilet business. Fortunately, modern day methods made it more hygienic and efficient!

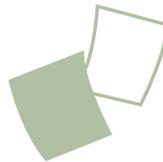

Transformation of Culture

EARLY CIVILISATIONS BCE

In early civilisations, people used raw materials such as leaves to clean themselves after using the loo.

1400 PAPER

It was until the invention of paper in the early 1400s, paper such as newspaper and magazines were common items used to clean after using the toilet.

1850 TOILET PAPER

The first commercialised packaged toilet paper was invented.

1960 BIDET

The revolutionary bidet was invented in the 1960s for medical reasons and through years of innovation we have our modern day bidet today.

HOW MUCH TIME
do you spend
in the toilet?

4,380
MINUTES
PER YEAR

73
HOURS
PER YEAR

1 hour 42 minutes a week,
92 days over a lifetime.

Even after spending so much time in the toilet, but how much do you know about the toilet?

Did you know?

MOLD TENDS TO GROW IN WET RESTROOMS,

causing the risk of allergies and respiratory health issues.

*The hand-held hose which often leaks might be the cause of wet floors.

1 OUT OF 7 MALAYSIANS

fall in wet restrooms.

MANY POST-SURGERY PATIENTS

and women after giving birth face challenges cleaning themselves after their private businesses.

AN AVERAGE PERSON USES ABOUT 384 TREES

within their lifetime to wipe their behind with toilet paper.

Smart BIDET to the rescue!

**BETTER PERSONAL AND
RESTROOM HYGIENE,
FOR BETTER HEALTH.**

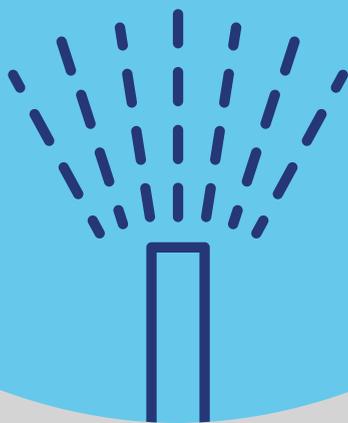

REDUCE
THE RISK OF FALLING
IN WET TOILETS.

**CONVENIENT
CLEANING**
FOR PEOPLE WITH
MOBILITY ISSUES.

ECO-FRIENDLY
TO THE ENVIRONMENT,
BY REDUCING THE USAGE OF TOILET PAPER.

Care for Your Health

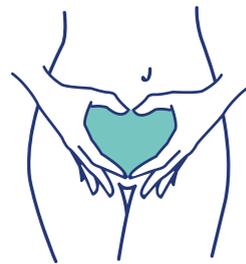

Bidets can help relieve discomforts caused
from medical conditions.

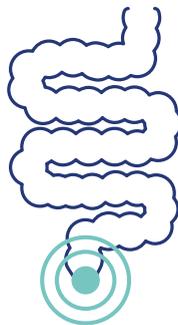

CONSTIPATION

Bidets can decrease constipation because it helps to relieve pressure or pain near the rectum area.

POST-OPERATIVE CARE AFTER DELIVERY

Using warm water bidet for cleansing improves the vaginal environment.

HAEMORRHOID CARE

Bidet reduces anal resting pressure and provides relief in patients who have haemorrhoids.

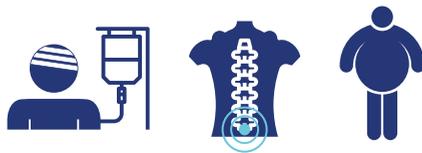

For the Elderly

Some senior citizens may face mobility difficulties in their daily life, going to the toilet independently should not be such a burden.

User-friendly control buttons with simple icons help them understand the usage of each function easily.

For the Physically Challenged

Post-surgery patients, people with back pain issues,
plus size individuals can choose a smart bidet for
better cleansing experience.

Improve **toilet
accessibility.**

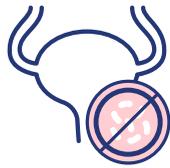

Improve **personal
hygiene.**

Pregnant Women

The bidet benefits pregnant women in many ways as you progress further into your pregnancy.

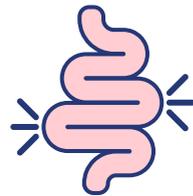

PROVIDES BLADDER INFECTION (UTI) RELIEF

Bidets are more hygienic than wiping with toilet paper.

PROVIDES HAEMORRHOID CARE

Bidets are more gentle for cleansing in Haemorrhoid patients.

PROVIDES CONSTIPATION RELIEF

Bidets help relax the anal muscles and stimulate bowel movement.

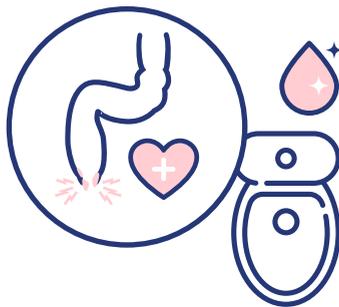

PROMOTES FEMININE HYGIENE

Cleansing with water promotes a healthy vaginal environment.

NORMAL USE OF THE BIDET TOILET
by pregnant women poses no clinical health risk
for preterm birth and bacterial vaginosis.

HELPS WITH HAEMORRHOIDS,
lack of mobility, cleanliness
before and after delivery.

Benefits for Children

Daily use of the bidet teaches kids to clean themselves more thoroughly and raises awareness for the importance of cleanliness.

CHILD FRIENDLY

Young children have difficulty in properly cleaning themselves after using the toilet. Daily use of the bidet teaches kids to clean themselves more thoroughly and promote awareness of the importance of cleanliness.

BETTER HYGIENE

Avoid having to feel unclean when you leave the bathroom and you will get a fresh feeling every single time. It is a great way to get more from your bathroom experiences, no matter what you have in mind.

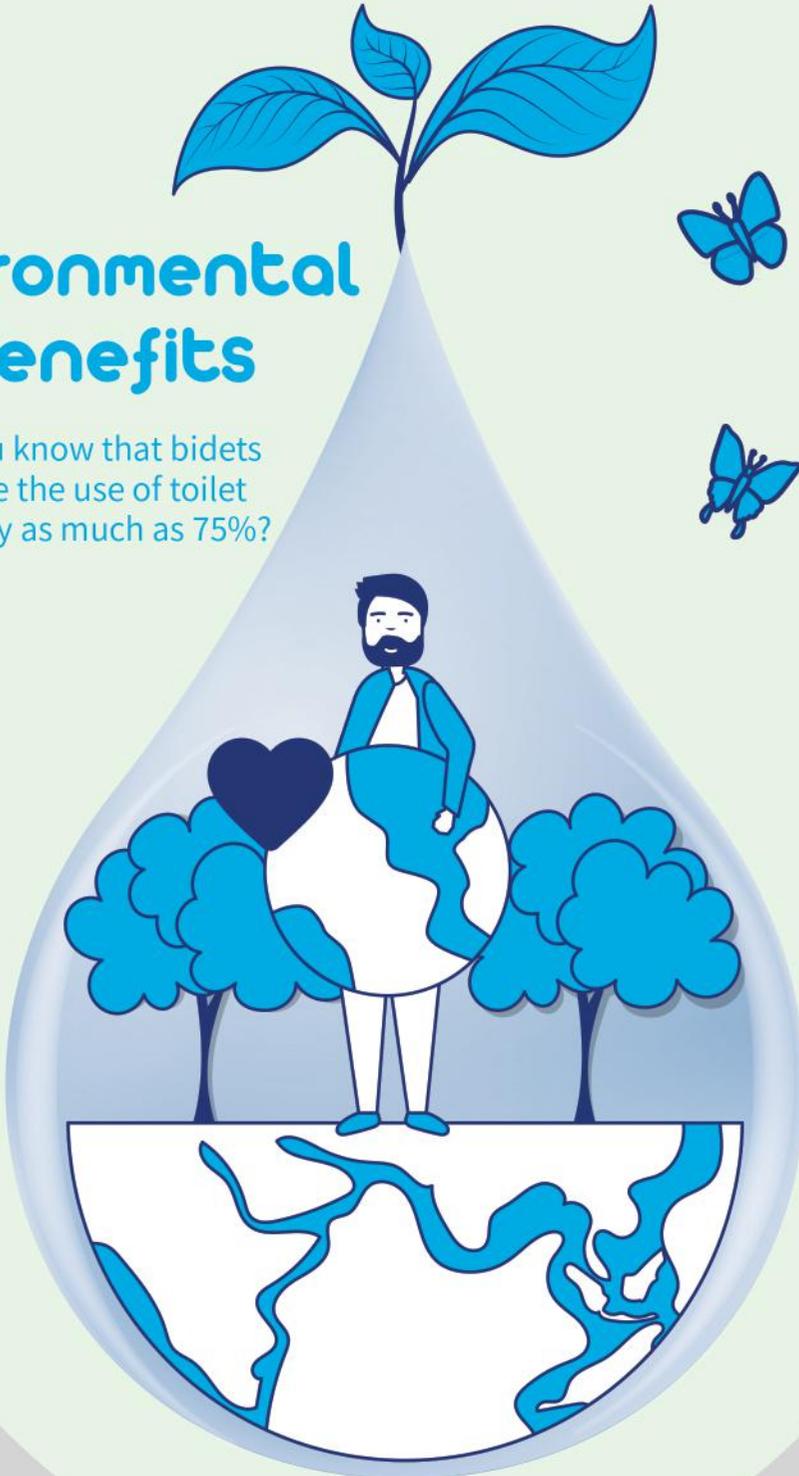

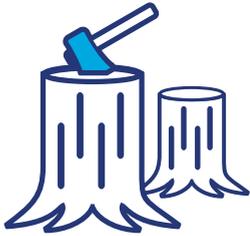

SKINCARE

Using dry toilet paper to clean up after you use the bathroom can be rough on your skin. If you have any skin irritation or other problems then warm water can be soothing, and staying as clean as possible will make you more comfortable.

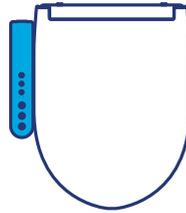

Environmental Benefits

Did you know that bidets reduce the use of toilet paper by as much as 75%?

**10% OF
TOILET PAPER**
is made out of
270,000 trees.

A BIDET USES LESS WATER
than the process of manufacturing
toilet paper. Using a bidet actually
saves more water.

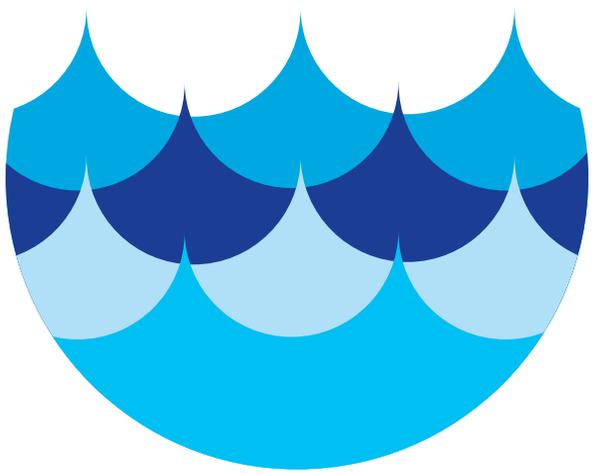

REDUCES RISK
of clogging toilet
because of toilet paper.

ECO-FRIENDLINESS
Bidets reduce the use of toilet
paper by as much as 75%.

**Here's a
Solution
for You**
